Education

B.Tech – Computer Science Engineering (AI & ML)

SRM Institute of Science and Technology, Trichy 2023 – Present

Technical Skills

- **Programming:** Python, JavaScript, C
- **AI/ML:** LLMs, NLP, Deep Learning, Transformers, Hugging Face
- **Backend & Systems:** FastAPI, Django, REST APIs, Node.js, Microservices Architecture
- **Data & Infrastructure:** Neo4j, NetworkX, Data Pipelines, Web Scraping, Celery, Redis
- **Core CS:** Data Structures & Algorithms, System Design
- **Tools:** Git, Docker

Experience

Software Development Intern — RedBus Pvt Ltd

May 2025 – June 2025

- Developed LLM-based chatbot handling 100+ queries per session, improving response automation and user engagement
- Built backend system for route optimization and occupancy prediction
- Designed recommendation engine for dynamic offers, improving personalization workflows
- Implemented modular AI pipelines for scalability

Software Development Intern — Srishti Innovative (Technopark)

Dec 2024

- Developed ML solutions using Python and structured data pipelines
- Improved model performance through preprocessing and feature engineering

Techsaksham AICTE Internship (Microsoft + SAP)

Oct 2024 – Nov 2024

- Built ML models for enterprise-level use cases
- Worked on AI workflows and deployment pipelines

Projects

GovIntel – Governance Intelligence Platform *Ongoing*

- Architected AI-powered governance platform with multi-service backend (600+ files scale)
- Built microservices using FastAPI and Django for scalable APIs
- Developed NLP pipelines for sentiment analysis, topic modeling, and policy insights
- Implemented graph intelligence using Neo4j and NetworkX
- Designed automated data ingestion pipelines (scrapers, RSS feeds)
- Built asynchronous processing system using Celery
- Integrated Redis caching and scalable API infrastructure
- **Tech Stack:** FastAPI, Django, Neo4j, Redis, Celery, Docker

AI-Powered Chatbot (LLM-Based)

- Built chatbot supporting multi-user concurrent interactions
- Designed backend decision engine for real-time response generation
- Developed scalable architecture for high throughput
- **Tech Stack:** Python, LLMs, FastAPI

A2A NLP Pipeline System

- Built modular NLP pipeline using Hugging Face Transformers
- Implemented NER, Sentiment Analysis, and Text Summarization
- Designed scalable backend orchestration
- **Tech Stack:** Python, Transformers, NLP

Certifications

- Deep Learning Onramp – MathWorks
- Introduction to Databases – Meta (Coursera)
- IBM Professional Skills
